Product Description

From lead and asbestos abatement to spray painting to food processing, Tyvek® garments have long been the first choice in protection for very good reasons. Tyvek® is an inherent barrier to small-sized hazardous particles. Protection is built into the fabric itself. There are no films or laminates to abrade or wear away. In fact, tests prove the Tyvek® barrier is more than twice as durable as a microporous film or SMS fabrics. • Enables a greater range of movement while stretching and bending • Improves mobility with more room throughout the back • Provides a more tailored fit and better overall comfort • Is easier to get on and take off • Is reinforced in high-stress areas for fewer blowouts

Features

- Tyvek disposable coverall
- Zippered front
- Elastic ankles and wrists
- White
