

EROSION TUBE SILT SOCKS

Product Description

SPSLTSK-8

60m palletized and shrink-wrapped with 25 x 2’ stakes Silt Socks are a filter fabric sock filled with wood chips. It allows water to flow through at a controlled rate while trapping sediment. The design of the sock provides intimate contact with the ground preventing water from flowing underneath. Filled socks are used as an alternative to a silt fence in many areas. The socks are filled with 100% virgin lumber wood chips. Many contractors are getting multiple uses out of the product. Smaller diameters can be moved from one job site to another if treated properly.

SPSLTSK-12

33m palletized and shrink-wrapped with 25 x 2’ stakes Silt Socks are a filter fabric sock filled with wood chips. It allows water to flow through at a controlled rate while trapping sediment. The design of the sock provides intimate contact with the ground preventing water from flowing underneath. Filled socks are used as an alternative to a silt fence in many areas. The socks are filled with 100% virgin lumber wood chips. Many contractors are getting multiple uses out of the product.
