- Self-contained multi-layer unit
- Superior to stapling boxes to pallets
- Lightweight and compact at 3'X3'X3'
- Lowers disposal costs as compared to 55-gallon drums
- Collapsible for easy storage

Available In

36 per pallet

Product Description

PacTec's LiftPac® is the only self standing zipper-top hazardous waste bag on the market. This cubic yard bag is the perfect solution for disposal of household hazardous waste, contaminated PPE and a variety of other applications. The LiftPac® walls are constructed of rigid corrugated fiberboard allowing the bag to be self-standing, while the glued in 6 mil PE liner provides ultimate leak protection. It contains the equivalent of four 55-gallon drums and can hold over 3,000 pounds at a significant savings in cost and storage space. They are lightweight, easy-to-assemble, versatile and can easily be lifted by forklift with attached loops.

Features

- UN-Rated "X" for Packaging Groups 1, II and III
- Cardboard sidewall supports hold bag open for easy filling
- Patented zipper closure
- UV Coated, weather resistant outer layer
