Product Description

When choosing cut-resistant gloves it is very important that your governing safety body approves each and every style of cut-resistant glove for each specific task. Our gloves constructed with liners that are knit with certain cut-resistant fibers like Kevlar, glass, metal mesh, Aramid, or HPPE. These fibers promote cut resistance while still permitting dexterity, comfort, and fit. These gloves unless CLEARLY indicated are not cut proof. Wipeco Industries and its sales representatives cannot recommend any styles but can provide samples for your testing.

Features

Features

- EN 388 cut level 3
- ANSI Cut Level A1
- Polyurethane coating provides breathability
- Excellent dexterity
